1. Introduction

EGMT is a revolutionary & only token that lets you earn 7-10% STEP N GMT(BEP-20) Rewards while you just simply hold it in wallet. Earning while sleeping is one of the dream activities which everyone wants to perform whether they're in their house or outside. Keeping this in mind, we have come up with a unique concept where you can get strong both physically and financially because STEP N GMT Motivate you to for fitness and EGMT will take care of your financial growth by rewarding you on daily basis.

EGMT strives to urge the users to follow a healthier lifestyle, lessening global warming, develop financial independence, and boost self-confidence. All this with few easy steps and less hustle.

Users can simply buy and hold EGMT and Add BEP-20 STEP N GMT token in their wallet and watch their STEP N GMT rewards are growing day by day.

1.1 Vision

We at **EGMT** wanted to develop something which would be class apart from the competition which would allow users to get more fit and healthy and get wealthier by earning STEP N GMT. We checked the competition and saw users are only been given some rewards or coupons to said products as a reward but we at EGMT firmly believe in STEP N GMT and so we decided to develop a token which will give our Holders a financial incentive for just Holding EGMT.

This should give a reason for the holder to earn more and live a financially free life so they can focus on their fitness which will reduce the carbon foot print on earth too. Unlike other tokens we believe in purpose of creating financially free community so EGMT is focused purely on that.

Also, with our further roadmap in which we're going to Collab with Fitness brands and gym chains to accept EGMT as payment, it will make people more aware about their fitness and will make many non-crypto users use cryptocurrency as a standard to buy Fitness gears, clothes and memberships of fitness clubs.

1.2. Background

Since the rise of cryptocurrency in 2009 there have been no token built on cryptocurrency on any blockchain which would purely give rewards to fitness enthusiasts.

When we do this, we eliminate any possible breach in our holder's wallet, any misuse of holder wallet or holder crypto. We wanted to give our users a complete secure and automatic rewards in form of a token which is pure gold for hold which will just deposited to holder's wallet address and nothing else. Our users can get 7 to 10% rewards on every transaction as per their holding % of EGMT (Min 0.10% to get rewards). Users must own a minimum of 0.10% tokens in their wallet to be eligible for rewards. 15% buy tax 18% sell tax will be applied on every EGMT transaction. This is to make sure that no price manipulation can be done by any pump and dump groups on our EGMT token.

1.3 Important Terminology

- a) Crypto-Acryptocurrency, crypto-currency, **Crypto** is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any central authority, such as a government or bank, to uphold or maintain it.
- b) Blockchain - **Blockchain** is a shared, decentralized, distributed immutable ledger that facilitates the process of recording transactions and tracking assets in a business network
- c) Binance Chain - Binance Chain allows users to develop decentralized applications on top of the chain. It is a decentralized and transparent blockchain and also offers low trading fees. That is why we are built on top of Binance Smart Chain.
- d) BEP20 - BEP20 is a Binance token standard which allows users to deploy fungible tokens or cryptocurrencies on BSC. More specifically, leading crypto assets on other chains can be transferred to the Binance smart chain in the form of pegged BEP20 tokens.
- e) NFT - A non-fungible token is a non-interchangeable unit of data stored on a blockchain, a form of digital ledger, that can be sold and traded on the blockchain.
- f) Wallet address - A wallet address is a sequence of numbers and letters, with no spaces nor symbols. Each wallet address is unique and there is no other wallet address like it. It is the unique identifier for your account on the blockchain.
- g) Metamask - MetaMask is a software cryptocurrency wallet used to interact with the Ethereum blockchain. It allows users to access their Ethereum wallet through a browser extension or mobile app, which can then be used to interact with decentralized applications.

- h) Trust Wallet – Trust wallet is a software cryptocurrency wallet used to interact with the Binance blockchain. It allows users to access their Binance wallet through a browser extension or mobile app, which can then be used to interact with decentralized applications.
- i) KYC - The know your customer or know your client guidelines in financial services require that professionals make an effort to verify the identity, suitability, and risks involved with maintaining a business relationship.
- j) Block - Groups of data within a blockchain. On cryptocurrency blockchains, blocks are made up of transaction records as users buy or sell coins. Each block can hold only a certain amount of information. Once it reaches that limit, a new block is formed to continue the chain.
- k) Cold Wallet - A secure method of storing your cryptocurrency completely offline. Many cold wallets (also called hardware wallets) are physical devices that look similar to a USB drive. This kind of wallet can help protect your crypto from hacking, though it also comes with its own risks – like losing it, along with your crypto.
- l) Exchange - A cryptocurrency exchange is a digital marketplace where you can buy and sell cryptocurrency.
- m) Private Key - The encrypted code that allows direct access to your cryptocurrency. Like your bank account password, you should never share your private key.
- n) Staking – Staking offers crypto holders a way of putting their digital assets to work and earning passive income without needing to sell them.
- o) Staking pool - A staking pool is a group of coin holders merging their resources to increase their chances of validating blocks and receiving rewards. They combine their staking power and share the rewards proportionally to their contributions to the pool.

1.4 Supply

Step has a max supply of 100 billion EGMT tokens with variable burn of 30%, 10% token used for team and Core members and 50% EGMT tokens will be used for fair launch on pancake swap. 10% of the tokens will be released to CEX/DEX listings as per the roadmap target.

2. What is STEP N GMT (Our Rewarding Token)?

STEPN is built around an essential daily activity for most people – moving around. We are the first project to effectively bring to life a functioning move&earn concept, finishing 4th out of 500+ projects at the Solana Ignition Hackathon 2021.

Users equip themselves with NFTs in the form of Sneakers. By walking, jogging, or running outdoors, users will earn game currency, which can either be used in-game, or cashed out for profit.

With Game-Fi, **STEPN** aims to nudge millions toward a healthier lifestyle, combat climate change and connect the public to Web 3.0, all while simultaneously hinging on it's Social-Fi aspect to build a long-lasting platform fostering user generated Web 3.0 content.

Governance Token: GMT,

Contract Address: (0x3019BF2a2eF8040C242C9a4c5c4BD4C81678b2A1 Binance smart chain)

On Apple devices can use trust wallet to store your EGMT & GMT safely & same as in Android.

We never take any other data of the users or will ask any other permissions apart from the ones to track above health data.

We Believe in crypto and the STEPN GMT rewards which is being sent to the users are also with just their wallet address and nothing else. Unlike fiat currency EGMT uses the Binance Smart Chain network to safely give users funds which they can sell and exchange for other tokens or just cash it out.

While we respect users' privacy, we don't have any Dapps for user to collect their rewards manually by connecting their wallet in place just to make sure that no malicious user can get more rewards or use the Dapps/reward in unauthorized way.

3. Staking

Our users will have staking, farming, liquidity pool all 3 option after Fair launch with 0.10% tokens to 1% tokens limit.

In future, Users can go to <https://stepandearn.com> to stake EGMT tokens. Users will be get best in the market APY for staking EGMT for selected locking period. With our generous interest rate which varies on how many users are there and how much they own in the pool.

With EGMT staking all holders will have a chance to stake their tokens which means users can earn passive income from staking their Step tokens which is in addition to the rewards

they get for holding the EGMT and just enjoying their STEPN GMT rewards and APY returns.

Users can not withdraw the staked EGMT coins for Certain locking period and there is a lock in period,

There will be both options for manual and auto compounding to get you the best APY out of your staking.

4. Tokenomics

Step taxes 15% on every buy and 18% on all sells:

From these taxes:

- 7%(Buy) & 10%(Sell) to STEPN GMT Rewards to holders
- 3% to liquidity pool(buy/sell)
- 5% to marketing wallet

Total Supply: 100Bill. EGMT

Rewards eligibility:

- At least 0.10% EGMT Supply

EGMT Holders get their Rewards as per their share in total supply and volume is the key factor to rewards, it basically means that more volume, more Rewards & low volume, less rewards.

5. Use Case

This can be used by anyone who has a smartphone (which almost everyone has now a days). It doesn't require any additional work and people who walk day to day will be rewarded and it will not only benefit them monetarily but also physical fitness. That's our goal at **EGMT**.

Once the users buy EGMT and get rewards which one can cash out should motivate them to earn more by holding more EGMT. Anyone can use Metamask/Trust wallet from kids to adults to old people so that they get rewarded with STEPN GMT.

Unlike other tokens we don't have a Dapps to connect the wallet and give necessary permissions and enter the wallet address where you want the rewards, our rewards system is automatic mechanism which will distribute the rewards automatically when it has rewards with transaction gas fee in wallet.

Due to covid people are staying indoors they too will get a reason to earn extra income and by staking it they can get more passive income. All to get them healthy and wealthy when we'll do collaborations with fitness brands and Gym chains so they can utilize their EGMT token to buy

fitness equipment, clothing and to pay their Fitness club membership fees.

EGMT makes fitness cheap and rewarding. Unlike Normal person who buy GYM membership at the beginning of the year but then slowly stop going to it because they it's a heavy membership fees he's paying from his wallet on monthly and yearly basis. EGMT gives you rewards daily so that the brain gets its dopamine and you keep Spending more and more to get yourself fit and try fancy Gym wears and Equipment by Buying it through Your EGMT token Or by Cash out of GMT rewards.

With rewards as high as 7-10% a day just for Holding can motivate anyone to get out of the bed and get fit without fearing of club membership fees. That's the purpose of the EGMT get you healthier and get you extra income by Holding EGMT. Theoretically if you earn 7%to10% by every buy and sell transactions.

6. Conclusion

We have presented a new idea of rewards cause of which we are having a fast-growing holder base who loved the idea and are joining day in and day out which is proving that we the team at **EGMT** are on the right track. We provide a safe and seamless token which users can use with ease of mind and every day and get crypto reward every day. Moving forward we are also going to introduce new things like our NFT collection, metaverse and more. Our team at **EGMT** will keep on making new innovations and ideas so that it will help our holders more and more. So, let's get healthier and wealthier together hold the EGMT and Earn the STEP N GMT now.
